#### FUNCTION

Thermally optimised heatsink and cooling ring creating a chimney effect to keep electronic components cool.

#### MODULARITY

Discrete fixing mechanism for external ewoLightLayers and transformative accessories.

#### FORM

Elegant luminaire design with clean lines, soft curves and concealed screws.

## A DIVERSE HABITAT

Chameleon is a common creature across all areas of the urban jungle.

## A DUAL FUNCTION

Chameleon is designed to be active from sunset to sunset. During the day, its optional accessories such as a shadow sail offer new types of functionalities.

## A NEW LEVEL OF ADAPTABILITY

Sustainability is at the heart of all ewo products. With its modular design, Chameleon is reaching new heights of sustainability with replaceable and recyclable components as well as the opportunity to upgrade luminaires, all leading to a longer product life.

THROUGH ITS TRANSFORMATION,  
CHAMELEON CAN TRANSFORM SPACES

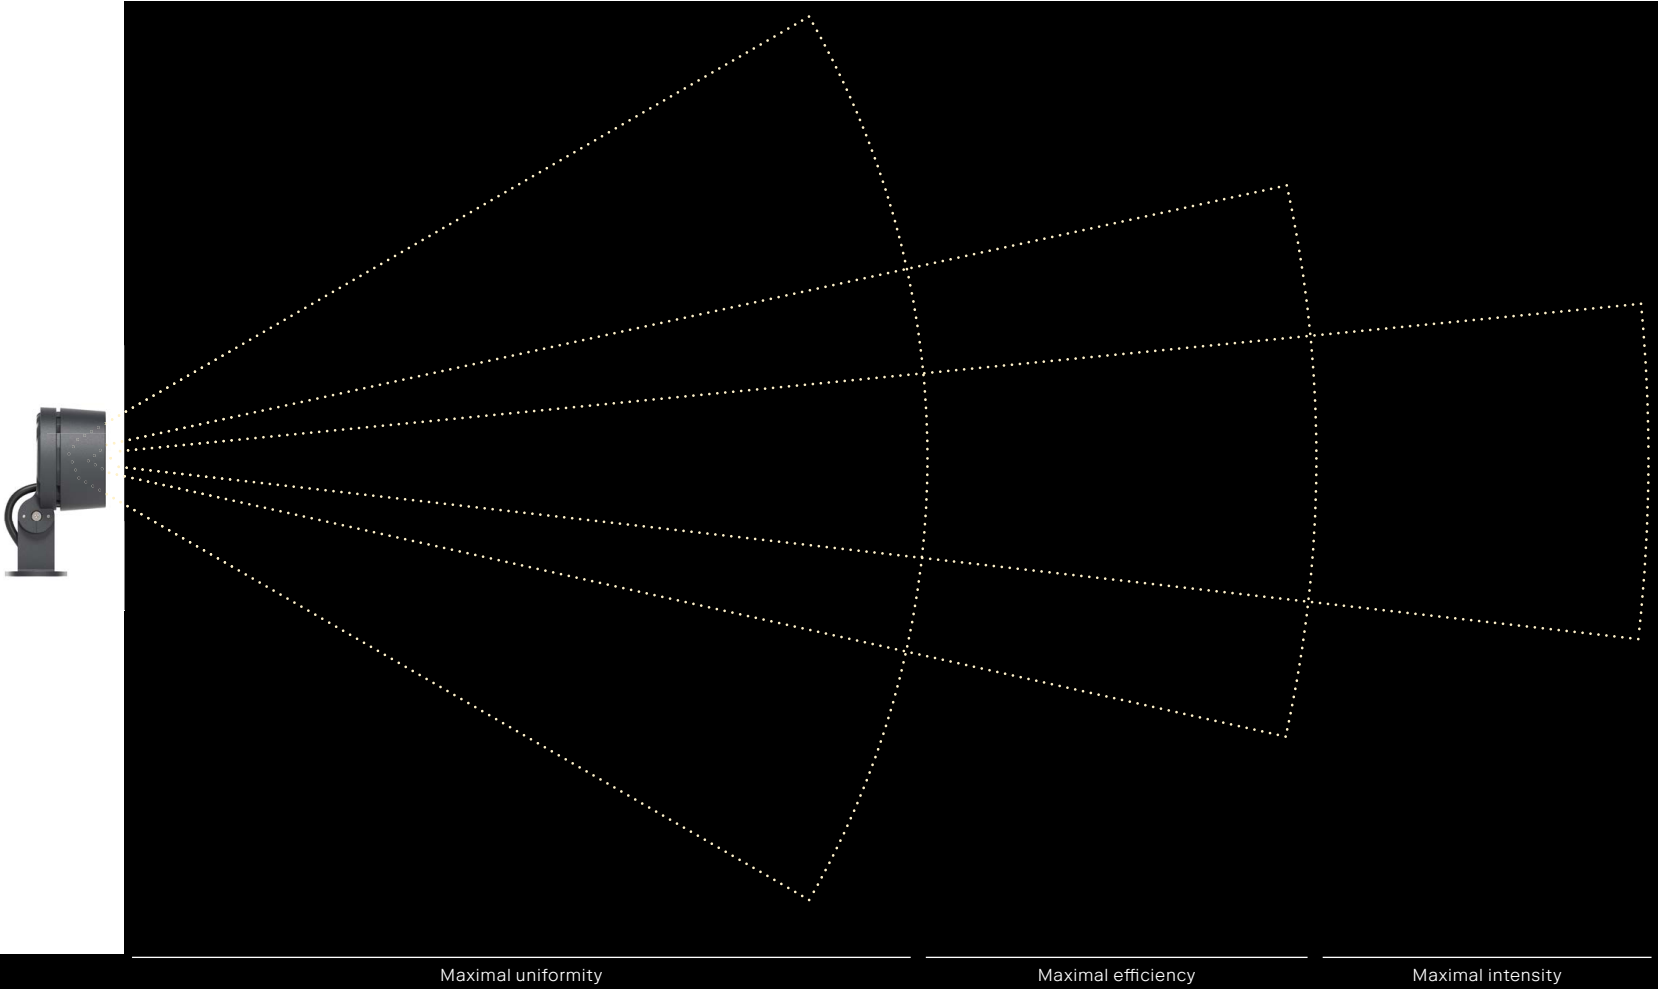

With its unrivalled modularity, Chameleon uses a vast catalogue of mounting options, ewoLightLayers, optics and finishes to adapt seamlessly to a plethora of applications including Architecture and the Arts, Public Spaces, and Road and Traffic.

STANDARD DISTRIBUTIONS

ewo's high precision lens optics have the power to transform public spaces into urban sanctuaries, improving people's wellbeing outdoors.

### COLOUR MIXING RGBW

To create the best possible colour experience in a luminaire as compact as Chameleon, ewo has developed a new two-level light guiding lens that will mix colours in each individual lens. Now the desired light effect can even be achieved over short distances whilst maintaining perfect colour uniformity.

### DYNAMIC WHITE AND COLOUR

Chameleon is the most compact, intelligent projector offering dynamic lighting with in-optic colour mixing and beam angles as narrow as 12°.
